

JP Series

7" Touchscreen Video Intercom
with Room-to-Room Communication

Combine entry security and internal
communication into one reliable system

Touchscreen Simplicity

Know exactly who is at the door, even from across the room. The 7" touchscreen displays clear images from the door station and traditional buttons are replaced with an intuitive, modern interface.

Choose Your Preferred Communication Style

HANDS-FREE FOR CONVENIENCE

Simply touch the screen and easily communicate with visitors using the built-in microphone and speaker.

Popular Applications: Offices, Homes

HANDSET FOR PRIVACY

Pick up the handset at any time during conversation. Perfect for noisy environments.

Popular Applications: Hospitals, Schools

Simple Wiring

Between door and master station:

- Standard 2-conductor cable, like doorbell wire
- For distances under 165', use the green and blue pairs from a Cat-5e/6 cable

Between inside stations:

- Cat-5e/6 cable (homerun or daisy-chained)

Record Who Visited

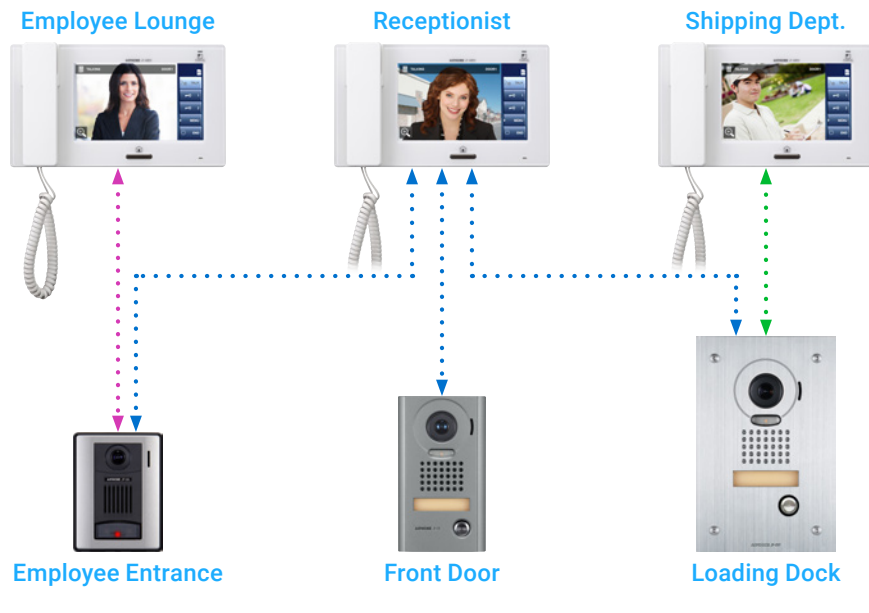

- The JP Series automatically takes pictures of visitors
- Transfer images or save directly to a removable SD/SDHC card*
- Easily view recorded images on a computer or other compatible device

**SD and SDHC cards are not supplied by Aiphone.*

Partitioning Creates More Application Opportunities

- Control interaction and authority between stations
- Designate exclusive master station(s) to communicate with, and unlock, a specific door or set of doors
- Password protect to prevent unauthorized changes

JP Series Applications

Offices

Conveniently and safely identify visitors. Place multiple stations around the office to ensure every visitor is attended to in a timely manner. For broad surveillance of a location, use the optional adaptor to connect a CCTV camera to one of the door station inputs located on the master station.

Schools

Lock school entrances to maintain security. Identify visitors, and unlock doors safely and conveniently from the main office or from the principal's desk.

Homes

Install JP Series door stations in children's rooms to monitor infants. As the child grows, stations can be used to communicate with parents. Door stations can also be installed in areas to monitor live-in seniors and special needs individuals.

Internal Communication

- Easily communicate between stations
- Simultaneously make an announcement to all inside stations or select a single station to call

Monitor Door Stations

- See and hear activity on all inside stations
- View video from door stations, or CCTV cameras with the optional adaptor
- Monitor for 30 seconds, 60 seconds, 120 seconds, or continuously

Combine this intercom system with our AC Series access control solution for more security benefits!

Start with a Box Set

Each set includes a door station, master station, and a power supply

JPS-4AED
Box Set with JP-DA, JP-4MED, and PS-2420UL

JPS-4AEDV
Box Set with JP-DV, JP-4MED, and PS-2420UL
